2025 北京昌平高三二模

英　　语

2025.5

本试卷共 12 页，共 100 分。考试时长 90 分钟。考生务必将答案答在答题卡上，在试卷上作答无效。考试结束后，将本试卷和答题卡一并交回。

第一部分 知识运用（共两节，30 分）

第一节（共 10 小题；每小题 1.5 分，共 15 分）

阅读下面短文，掌握其大意，从每题所给的 A、B、C、D 四个选项中，选出最佳选项，并在答题卡上将该项涂黑。

I never considered myself artistic until that rainy autumn afternoon. Mrs. Riley, our art teacher, handed out canvases（画布）with an unusual 1，“Paint what you feel others cannot see.” My classmates 2 dipped brushes into bright colors, while I stared at the 3 surface, no idea in my mind, and immersed myself in self-doubt.

For years, I had 4 to draw except for stick figures and convinced that 5 wasn’t my gift. But as raindrops tapped the window like a piece of beautiful music, an idea sparked—I mixed greys and blues to capture the rhythm of the storm. To my 6 , Mrs. Riley paused and looked at my drawing. “This... has depth,” she murmured, nodding her head slightly.

That night, I lay awake, torn between excitement and fear. My sketchbook (速 写 本), long hidden under textbooks, resurfaced like an old friend. I began sketching shadows dancing through streetlights, steam curling from teacups—ordinary magic I’d always 7 .

Weeks later, the school exhibition arrived. My piece “Urban Symphony” hung beside abstract paintings. Visitors rushed past my work without pause until a little girl pulled her mother’s sleeve. “Look! It’s like the city is breathing!” Her words were beyond my personal 8 .

Now, as I prepare for art college, I often recall Mrs. Riley’s wisdom: “Vision grows when we dare to 9 the invisible.” That blank canvas taught me creativity isn’t about skill, but the 10 to share our unique perspectives.

1. A. task	B. gift	C. sign	D. game
2. A. suddenly	B. eventually	C. immediately	D. casually
3. A. messy	B. blank	C. torn	D. rough
4. A. pretended	B. decided	C. promised	D. refused
5. A. sincerity	B. creativity	C. curiosity	D. generosity
6. A. surprise	B. anger	C. regret	D. horror
7. A. forgot	B. tracked	C. ignored	D. witnessed
8. A. control	B. authority	C. capacity	D. expectation
9. A. explore	B. question	C. create	D. protect
10. A. dream	B. chance	C. courage	D. demand

第二节（共 10 小题；每小题 1.5 分，共 15 分）

阅读下列短文，根据短文内容填空。在未给提示词的空白处仅填写 1 个恰当的单词，在给出提示词的

空白处用括号内所给词的正确形式填空。请在答题卡指定区域作答。

A

Olivia Vibbert,14-year-old, tried to establish her own nonprofit. In 2016, 11 (help) the homeless in winter, she requested sock donations when knowing socks are among the most needed items. The campaign started out with the big goal of 1,000 sock donations—a milestone that 12 (achieve) in mere days. Then she went on to collect more socks. So far, Olivia 13 (receive) over 8,000 pairs of donated socks.

B

Research shows that people are more likely to maintain an exercise routine if they enjoy the activities they choose. If the exercise you are doing is not enjoyable, your motivation will gradually decrease. So you need to find 14 interests you. Some gyms offer a taster session before you sign up, 15 can help you get a feel for what a new place might be like. Once you find a style you enjoy, you will be 16 (cheerful) than ever.

C

While social media has connected people globally, its overuse may harm mental health. Teenagers spending hours scrolling short videos often feel lonely, 17 (lack) real communication. Studies 18 (conduct) in 2023 show that 60% of users compare their lives to others' posts, leading to anxiety. However, used 19 (wise), these platforms can promote cultural exchange. Educators suggest limiting screen time and engaging 20 offline some activities. After all, technology is meant to serve humans, not control them.

第二部分 阅读理解（共两节，38 分）

第一节（共 14 小题；每小题 2 分，共 28 分）

阅读下列短文，从每题所给的 A、B、C、D 四个选项中，选出最佳选项，并在答题卡上将该项涂黑。

A

Investor Services is one of the core departments in Global Core Operations, mainly in charge of shareholder meeting services to listed issuer clients.The Student Intern (实习生) will mainly support the team to ensure timely service delivery.

A role you will love:

A three-month internship from October to the end of December will be an exciting opportunity

for a university student to gain fantastic exposure in a global corporation and deliver shareholder meeting services to listed issuer clients in China.

Other key responsibilities include:

• Provide meeting support and organize shareholders' meetings in Beijing, Shanghai or other

locations (including remote areas).

• Conduct meeting operations and learn meeting handling procedures, study various meeting types and their specific requirements.

• Conduct preparation work, including but not limited to, drafting relevant documents, coordinating with relevant parties, arranging meeting logistics and setting up systems.

• Assist daily operation of the team and work closely with team members to ensure all daily tasks are completed accurately and promptly.

• Work at least 4 days a week and frequent travel may be required.

Requirements for the role include:

• University students, preferably in Finance, Accounting, Economic, Information Technology, Business or Computer Science related majors.

• Good communication skills, native in Chinese.

• Strong time management skills.

• Ability to work independently and collaboratively under pressure.

Rewards designed for you:

• Flexible working time to help you find the best balance between work and lifestyle.

• Health and well being rewards that can be tailored to support you and your family.

• Invest in our business by setting aside salary to purchase shares in our company, and you'll receive a company contribution as well.

21. In Investor Services, a student intern will_____.

A. edit drafts for the relevant clients

B. lead and support the team members

C. deliver shareholder meeting services

D. set up IT systems for the shareholders

22. The interns are required to have_____.

A. relevant experience

B. good communication skills

C. high proficiency in a second language

D. applicable degrees in Finance or Accounting

23. What will the company provide for the interns?

A. Flexible workplace without pressure.

B. Priority to buy company shares.

C. Personalized fitness plans.

D. Tailored health benefits.

B

At 17 years old, most are still learning basic driving skills in America. Once the car is parked, the day is packed with school activities and hanging out with friends. But at 17, Maggie Taraska had a distinctive goal in mind: Fly alone across the United States.

Both of Maggie's parents were retired from the air force, so the urge to fly is in Maggie's blood. She went to flight school, put in the hours with an instructor and started on her training hours. But on her first takeoff, something didn't sound right. The plane had lost one of the landing gear wheels. "As soon as I took off, I just heard something was wrong instinctively." said Maggie.

Her instructor talked to her from the ground while she circled a few times to gather herself. "I was frightened, thinking about all the bad things that could have happened; I was thinking about how my parents were on the ground as I knew they were watching."

Stress and panic can cause any of us to make careless decisions. It takes mental practice to calm down. "Take a few breaths, focus on the moment and follow the plan. I panicked a bit, but followed my training."

Maggie was a little shaky as she talked to the tower, but she had a perfect belly landing that skidded on the infield grass. Her father couldn't be prouder. "By the time I saw Maggie on her approach, it was a better approach

than I could have flown," he said. Cheers erupted in the tower , and Maggie took a deep breath and climbed out of the plane.

Credit does go to the crew for talking to her. Yes, we all need someone to talk us through challenging times, but in the end, it was all Maggie at the controls. We could all be forgiven for calling it quits after an experience like that. After all, it was a bit distressing. So walking away would be understandable. But five days later, Maggie was going through her pre-flight safety inspections, checking the wings, especially checking the landing gear.

"It feels amazing," she said, "It gives an incredible sense of liberation." At some point in our lives, we will all be in a situation for the first time. It's scary. But if you face your fears, the whole world opens up to you.

24. Maggie's urge to fly alone was mainly influenced by_____.

A. her parents' background in air force

B. her experience of school activities

C. her instructor's encouragements

D. her basic driving skills

25. When Maggie heard something wrong during takeoff, she_____.

A. landed the plane immediately

B. thought of her parents' expectation

C. circled a few times to calm herself down

D. continued flying as if nothing had happened

26. Which words would best describe Maggie's personality?

A. Proud and intelligent.

B. Positive and cautious.

C. Patient and responsible.

D. Fearless and determined.

27. What can we learn from the passage?

A. Failure is the mother of success.

B. A good beginning is half done.

C. Fortune favors the brave.

D. Practice makes perfect.

C

Microsoft Excel's auto-correction has long annoyed casual users. Dashes (破折号) before lists of numbers are misread as a minus sign. Phone numbers lose their leading zeroes. Credit-card numbers get re-expressed in scientific notation, like 1.30521E+17.

Geneticists struggle with a particular version of this problem. A gene (基因) called Membrane Associated Ring-CH-type finger 1, commonly known as MARCH1, is, for instance, frequently re-encoded as the date March 1. Something similar happens to genes in the Septin family, of which SEPT1 is a member, and to Basic Helix-Loop-Helix Family Member E41, often known as DEC2.

This problem was first noticed in 2004, but was brought to wider attention in 2016 by Mark Ziemann of Deakin University, in Australia. By surveying 166,000 genomics-related papers published between 2014 and 2020, he and his co-authors showed that the number of papers using Excel has steadily increased, and the proportion with auto-correct errors is at around 30%.

Errors have also been flagged by researchers in other languages. In Portuguese, for instance, AGO2 (Argonaute RISC Catalytic Component 2) rebrands itself as Agosto 2. Dutch users experience problems with MEI1 (Meiotic Double-Stranded Break Formation Protein 1), “Mei” being the Dutch for “May”. And geneticists in Finland, where the first month of the year is called Tammikuu, find TAMM41 encoding itself as 41st of January.

This continuing state of affairs is surprising. In August 2020, the committee which standardises gene names renamed those beginning MARC, MARCH and SEPT to begin MTARC, MARCHF and SEPTIN, and rebranded DEC1 as DELEC1. Other problematic gene names remained, but this was widely seen as a step in the right direction. Dr Ziemann’s latest paper, though, suggests that few researchers have taken it.

Such errors often seem amusing rather than dangerous. But they reflect a deeper problem, which is that spreadsheets allow such silent errors, too well camouflaged for authors or their editors to spot, to go undetected for years. To stop this, Dr Ziemann recommends researchers abandon software like Excel in favor of scheduled code written with scientific applications in mind. Such programs are more difficult to be autocorrected and easier to examine. Whether his advice will be taken this time remains to be seen.

28. As for Excel’s auto-correct issue, which statement might Dr Ziemann agree with?

A. Switching to science-specific coding tools.

B. Relying on Excel’s advanced function.

C. Adopting the renamed gene terms.

D. Avoiding auto-correct in papers.

29. What does the underlined word “camouflaged ” in the last paragraph probably mean?

A. Decorated deliberately. B. Hidden unnoticeably.

C. Corrected automatically. D. Increased sharply.

30. What is the purpose of the passage?

A. To emphasize the drawback of autocorrection in scientific research.

B. To explain a problem-solving procedure for autocorrection.

C. To recommend a new software to replace Excel.

D. To advocate a campaign to abandon Excel.

D

Of the many patients who need an organ from a donor, 90% go without. About 240 million people live with rare genetic diseases, most of which cannot be treated. Each year poor diets cause more than 10 million early deaths. Suffering on such an immense scale can appear hopeless. However, a technique called CRISPR gene editing promises to help deal with these issues and many more and proper regulation can help it develop.

CRISPR is like an editor for DNA. It can rewrite DNA, removing harmful mutations (突变) or adding protective ones. This summer, clinical trials (试验) will start on pig organs edited for human transplants. Last year, the first new treatment went on the market. It seemingly cures sickle-cell

disease and beta-thalassemia, two blood disorders that affect millions. If ongoing trials succeed, a one - time treatment might protect against heart attacks for life. CRISPR can also help farming. It can increase outputs or protect crops from climate change. Soon, consumers may get healthier,

tastier foods.

But now is a crucial time. Since its discovery in 2012, CRISPR has replaced old, less – effective ideas. Gene treatment, which uses viruses to insert genes, can treat rare genetic diseases but is expensive. Genetically modified

(GM) crops, which borrow genes from other species, face opposition in Europe. CRISPR offers a new way. But to succeed, it needs continuous investment, which means achieving real-world successes. For this to happen, scientists must show they can get CRISPR into more body cells easily and cheaply. If it can create personalized treatments for individual mutations, it will be even more useful. This requires new science and better regulation.

Current regulations for rare - disease drugs aren't suitable for new medicines. They stop patients from getting new treatments. Developing drugs for small groups has always been hard, and

many CRISPR companies are struggling. But CRISPR is programmable, so the same drug can target different mutations. If safety testing and manufacturing standards are loosened, small - batch drugs for rare diseases can be made more cheaply. For patients who may die before drug approval, this is a good trade-off.

Agriculture also needs reform. In many regions , gene - edited foods are regulated like GM foods, though they're different. Gene - edited plants have their own genes adjusted, not genes from

other species. Britain plans to pass new, looser laws for gene - edited foods to address climate change threats to food security. But public trust in regulators and scientists could be a problem.

31. What is Paragraph 3 mainly about?

A. The challenges and requirements for CRISPR's success.

B.The differences between CRISPR and GM farming.

C. The economic benefits of genetic engineering.

D.The history of CRISPR development.

32. What can be inferred about current safety testing standards?

A. They are unnecessary for CRISPR treatments.

B. They delay treatment access for urgent cases.

C. They ensure complete safety for all patients.

D.They focus only on agricultural products.

33. As for CRISPR gene editing, the author is _____.

A. critical B. doubtful C. indifferent D. positive

34. Which would be the best title for this passage?

A. CRISPR: Medical Breakthroughs and Funding Shortages.

B. CRISPR: Public Distrust in Agricultural Innovation.

C. CRISPR: Potential and Regulatory Adaptation.

D. CRISPR: Limitations in Current Applications.

第二节（共 5 小题；每小题 2 分，共 10 分）

根据短文内容，从短文后的七个选项中选出能填入空白处的最佳选项，并在答题卡上将该项涂黑。选项中有两项为多余选项。

Many people talk aloud to themselves. 35 Unlike the silent mental conversations termed inner speech, this behavior involves voiced expression. Researchers have observed that the phenomenon frequently arises in particular circumstances; those living alone, for instance, demonstrate heightened engagement with such self-dialogue. This inspires the researchers to investigate its psychological roots.

36 Talking out loud is a common way for people who spend lots of time alone to keep themselves company. For example, children who grow up alone practice self-talk more frequently than those who have brothers and sisters—

as well as adults who had an imaginary companion when they were kids.

Another significant factor driving people to talk out loud to themselves is the need to deal with stressful situations, particularly when they feel uncertain about how to act or what emotions to process. Research has shown that individuals tend to self-talk more when they are feeling anxious or dealing with repetitive thoughts. 37 Self-talk serves as a tool that helps them work through these challenges.

Age also plays a role in this behavior. Young children talk out loud to themselves as they are learning social roles. 38 The elderly are also more likely to self-talk, which may be due to their need for memory assistance or the result of lowered self-control.

Talking out loud to yourself is perfectly normal and even beneficial. It can improve how well you perform at a task. In one study, basketball players performed better when they talked through their moves out loud in an encouraging or instructional way. There can also, surprisingly, be a social aspect. In that case, self-talk blurs (模糊) the line between internal and interpersonal communication.

39_____

A. It is a behavior known as external self-talk.

B. Their self-talk focus more on recalling past events.

C. Upsetting experiences make people want to resolve them.

D. And eventually their self-talk becomes internalized as inner speech.

E. Social disconnection clearly stands out as one of several key reasons.

F. This behavior is commonly seen in people who have difficulty socializing.

G. It is a way to let other people directly or indirectly know what we are thinking.

第三部分 书面表达（共两节，**32** 分）

第一节（共 4 小题；第 40、41 题各 2 分，第 42 题 3 分，第 43 题 5 分，共 12 分）

阅读下面短文，根据题目要求用英文回答问题。请在答题卡指定区域作答。

In today's fast-paced, achievement-oriented society, productivity is often associated with time management. We often think that to be productive, we need to master time-management techniques. But have you ever noticed that when you're emotionally worn out, you struggle to stay organized or motivated? Or when you're overwhelmed, tasks like answering emails or doing laundry pile up?

Unresolved emotions, such as fears of disappointing others or missing out on opportunities, often drive people to over-commit. Even with a well-organized calendar, you may find yourself squeezing in extra tasks, only to feel overwhelmed and rushed, which can lead to anxiety or even depression. The problem is not your time-management skills, but emotional overload.

True productivity isn't about doing more in less time; it's about managing your energy, emotions, and well-being over the long term. Research shows that employees who practice emotional regulation experience 20-30% higher productivity than those who rely only on time management.

The good news is that emotional management isn't about grand gestures—it grows in small, intentional shifts. Start by pausing before agreeing to new commitments. When someone asks you to take on an additional task, don't immediately agree. Ask for some time to consider it and review your other obligations. Besides, separate your work outcomes from your self-worth. By shifting from a perfectionist mindset to a growth-oriented one, you will focus on learning rather than only on achieving perfect outcomes.

To get out of a seemingly cruel cycle, it takes patience and sensibility within yourself. Change is hard, but every step, no matter how small, is a step toward reclaiming your well-being.

40. What often make people over-commit?

41. What is true productivity about?

42. Please decide which part is false in the following statement, then underline it and explain why.

By shifting from a perfectionist mindset to a growth-oriented one, you will concentrate on managing emotions rather than only on achieving perfect outcomes.

43. Besides what is mentioned in the passage, what else can you do to better manage your emotions? **(In about 40 words)**

第二节（20 分）

假设你是红星中学高三学生李华，你校正在举办“戏曲进校园(Chinese Opera Enters the Campus)” 系列活动，你是活动的负责人，打算邀请你校英国交换生 Jim 来参加，请你用英文给他写一封邮件。内容要点：

1.活动时间与地点;

2.活动内容及邀请理由。

注意：1．词数 100 左右；

2．开头和结尾已给出，不计入总词数。

Dear Jim, _____

_____

_____ Yours,

Li Hua

（请务必将作文写在答题卡指定区域内）

参考答案

第一部分 知识运用（共两节，30 分）

第一节（共 10 小题；每小题 1.5 分，共 15 分）

1．A 2．C 3．B 4．D 5．B 6．A 7．C 8．D 9．A 10．C

第二节（共 10 小题；每小题 1.5 分，共 15 分）

11．to help 12．was achieved 13．has received 14．what

15．which 16．more cheerful 17．lacking

18．conducted 19. wisely 20．in

第二部分 阅读理解（共两节，38 分）

第一节（共 14 小题；每小题 2 分，共 28 分）

21．C 22．B 23．D 24．A 25．C

26．D 27．C 28．A 29．B 30．A

31．A 32．B 33．D 34．C

第二节（共 5 小题；每小题 2 分，共 10 分）

35．A 36．E 37．C 38．D 39．G

第三部分 书面表达（共两节，32 分）

第一节（共 4 小题；第 40、41 题各 2 分，第 42 题 3 分，第 43 题 5 分，共 12 分）

40. Unresolved emotions, such as fears of disappointing others or missing out on opportunities.

41. It's about managing your energy, emotions, and well-being over the long term.

42. **By shifting from a perfectionist mindset to a growth-oriented one, you will concentrate on <u>managing emotions</u> rather than only on achieving perfect outcomes.**

You will concentrate on learning rather than only on achieving perfect outcomes.

43.（略）

维度 分档	内容（8 分）	语言（8 分）	结构（4 分）
一档	（6-8） •内容完整，详略得当。 •表述与主题相关。	（6-8） 语言准确，基本无语言错误；句式多样。 语言表达基本得体。	（3-4） 条理清晰，结构合理。 衔接自然，行文连贯。
二档	（3-5） 内容基本完整。 表述与主题基本相关。	（3-5） 语言有一些错误，但不影响理解；句式有一定变化。语言表达不太得体。	（1-2） 条理基本清晰，结构基本合理。 有一定衔接手段，行文基本连贯。
三档	（0-2） 内容不完整。	（0-2） 语言有大量错误，影响理解。语言表达不得体。	（0） •条理不清晰。

	表述与主题不太相关或完全无关。		•支离破碎。

【注释】

1. 分数计算: 本题总分 20 分，采用分项评分方式，其中内容 8 分，语言 8 分，结构 4 分。 2. 评分时先判断作答内容与题目是否有关，若内容判为零分，语言与结构均为零分。

3. 英式、美式拼写均可接受。

内容要点：

1.活动时间与地点;

2.活动内容及邀请理由。

One possible version:

Dear Jim,

How's it going? I'm writing to invite you to our school's "Chinese Opera Enters the Campus" event, which will take place on July 10th at 3:00 PM in the school auditorium.

At the event, you'll enjoy performances like Beijing Opera, Kunqu Opera, and modern plays adapted from Chinese classics, which highlight the elegance of Chinese literature. What's more, after the performances, you can join an interactive workshop, where you'll not only try singing opera but also experiment with symbolic gestures and traditional face-painting techniques!

As an exchange student passionate about Chinese traditions, this is a great opportunity for you to experience Chinese opera culture as well as to engage with China's heritage beyond textbooks. Let me know if you're interested!

Yours,

Li Hua
